

TIP TIG

ADVANCED PIPE SPOOL WELDING STATION

The TIP TIG Advanced Spool Welding Station joins all the power and functionality of TIP TIG into a complete solution for the production welding of pipe spools: including the attachment of flanges, fittings, and valves. Because of its compact design, this welding automation is an extremely powerful system for ease-to-use and high productivity in a shop environment. Our Spool Welding Station is based on the TIP TIG Hot-Wire process and can operate at high deposition rates while maintaining an extremely high finish weld quality.
